WHEREAS, to accomplish its stated purposes, the Agency is authorized and empowered under the Act to acquire, construct, reconstruct and install one or more "projects" (as defined in the Act) or to cause said projects to be acquired, constructed, reconstructed and installed and to convey said projects or to lease said projects with the obligation to purchase; and

WHEREAS, BSL WOODBURY LLC, a limited liability company organized and existing under the laws of the State of Delaware and qualified to do business in the State of New York as a foreign limited liability company (the "Applicant"), has presented an application for financial assistance (the "Application") to the Agency, which Application requests that the Agency consider undertaking a project (the "Project") consisting of the following: (A)(1) the acquisition of an interest in an approximately 3.76 acre parcel of land located at 900 Woodbury Road, Woodbury, Town of Oyster Bay, Nassau County, New York (Section: 12; Block: 527; Lot: 24) (the "Land"), (2) the construction of an approximately 73,955 square foot building (collectively, the "Building") on the Land, together with related improvements to the Land, and (3) the acquisition of certain furniture, fixtures, machinery and equipment (the "Equipment") necessary for the completion thereof (collectively, the "Project Facility"), all of the foregoing for use by the Applicant and/or its affiliates as an assisted living facility consisting of approximately

Part 617, et. seq., as amended (the "Regulations" and collectively with the SEQR Act, "SEQRA"), the Agency must satisfy the requirements contained in SEQRA prior to making a final determination whether to undertake the Project; and

WHEREAS, pursuant to SEQRA, to aid the Agency in determining whether the Project may have a significant adverse impact upon the environment, the Agency has completed, received and/or reviewed (1) Part 1 of a Full Environmental Assessment Form, dated July 11, 2017; (2) NYSDEC's Environmental Resource Mapper; (3) New York State Historic Preservation Office's Cultural Resources Mapper; (4) the U.S. Fish and Wildlife Service's Information for Planning and Consultation Mapper; and (5) other relevant environmental information (collectively, 1, 2, 3, 4 and 5 shall be referred to as the "Environmental Information"); and

WHEREAS, pursuant to SEQRA, the Agency desires to conduct a review of the Project to determine whether the Project may have a significant adverse impact on the environment and whether an Environmental Impact Statement must be prepared with respect to the Project.

NOW, THEREFORE, BE IT RESOLVED BY THE MEMBERS OF THE NASSAU COUNTY INDUSTRIAL DEVELOPMENT AGENCY AS FOLLOWS:

Section 1. Based upon a thorough review and examination of the Environmental Information and upon the Agency's knowledge of the area surrounding the Land and such further investigation of the Project and its environmental effects as the Agency has deemed appropriate, the Agency makes the following findings with respect to the Project:

- (1) The Agency is undertaking an uncoordinated review of the Project in accordance with the requirements of SEQRA;
- (2) Prior to making a recommendation about the potential environmental significance of the Project, the Agency has consulted several information sources, and has considered the list of activities which are Type I Actions outlined in Section 617.4 of the Regulations, the list of activities that are Type II Actions outlined in Section 617.5 of the Regulations, and the criteria for

determining significance outlined in Section 617.7 of the Regulations; and

(3) In doing so, the Agency determined that the Project is an Unlisted Action pursuant to SEQRA as it involves the acquisition of an interest in an approximately 3.76 acre parcel of land. The Project does not meet or exceed any threshold for a Type I Action.

(4) No potentially significant adverse impacts on the environment are noted in the EAF and none are known to the Agency.

Section 2. Based upon the foregoing investigations of the potential environmental impacts of the Project and considering both the magnitude and importance of each environmental impact indicated, the Agency has determined that the Project will not have a significant adverse impact upon the environment. The reasons supporting this determination are as follows:

1. Impact on Land. The Project is not anticipated to create any potentially significant adverse impacts to land resources or land use. The Project consists of the demolition of all existing structures on the Land and the construction of an approximately 73,955 square foot building on the Land to be used as an assisted living facility. The zoning and land use classification will not change as a result of the Project as the use is permitted in the zoning district. The Project is consistent with surrounding uses, which are residential in nature. Accordingly, the Project is not anticipated to create any potentially significant adverse impacts to land resources or land use.
2. Impact on Water. There are no wetlands on site, nor is the Project located within the one-hundred foot buffer area of any wetland. The Project will not create a new water body. The Project is not located in a designated 100 or 500 year floodplain. Accordingly, the Project is not anticipated to create any potentially significant adverse impacts to water.
3. Impact on Air. The Project will not be a significant source of air emissions. The Project does not entail the types of activities or operations that require the Applicant to acquire an Air Facility Permit or that are associated with a significant potential for air emissions. Any potential impact on air as a result of construction activities will be minor, and temporary in nature. Accordingly, the Project will not create any significant adverse impacts to air resources.
4. Impact on Plants and Animals. Although some impacts to flora and fauna may potentially occur with the proposed construction at the Project site, the Land in the area of the Project does not possess significant ecological value as it is within a well-developed residential area. Accordingly, the

Project will not create significant adverse impacts to plants, animals or natural communities, wildlife habitat or wetlands.

5. Impact on Agricultural Land Resources. The Project is located in an area currently used for commercial and residential purposes. The Project will not involve the conversion or loss of agricultural land resources. Accordingly, the Project will not create any significant adverse impacts to agricultural land resources.
6. Impact on Aesthetic Resources. The Project will not be visible from any officially designated federal, state or local scenic or aesthetic resource. The Land is situated in a well-developed residential area and is consistent with surrounding uses. Accordingly, the Project is not anticipated to create any significant adverse impacts to aesthetic resources.
7. Impact on Historic and Archeological Resources. The Project does not contain, nor is it adjacent to, a building, archeological site or district which is listed on, or that has been nominated to the State or National Register of Historic Places. The Land does not contain, nor is it adjacent to, an area designated as sensitive for archeological sites by the NYS Historic Preservation Office. Areas near the Project were previously developed and lack the characteristics that would suggest the potential presence of any significant archaeological resources. Accordingly, the Project will not create any significant adverse impacts to historical or archaeological resources.
8. Impact on Open Space and Recreation. The Project does not comprise public open space nor is the Land or surrounding area currently used for public recreation. Accordingly, the Project will not create any significant impacts to open space or recreational resources.
9. Impact on Critical Environmental Areas. The Land is not located in or substantially contiguous to any Critical Environmental Area ("CEAs"). Accordingly, there will be no significant adverse impacts to CEAs.
10. Impact on Transportation. The Project will not result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services. Any impacts to transportation from construction activities associated with the Project will be minor, and temporary in nature. Accordingly, it is not anticipated that that Project will create any significant adverse impacts to transportation.
11. Impact on Energy. The Project may result in a slight increase in energy usage, however, existing utility lines serve the Project and no significant improvements are necessary to accommodate the Project. Accordingly, the Project will not create any significant adverse impacts to energy.

12. Impact on Noise and Odor. The Project is not expected to appreciably increase ambient noise levels or to create odors. The Project does not involve the types of activities that create significant noise or odors. Any impacts to noise and/or odor from construction activities will be minor, and temporary in nature. Accordingly, the Project will not create any significant adverse impacts to noise or odors.
13. Impact on Public Health. The Project does not entail the types of activities or operations that are associated with a significant potential for affecting public health, such as storing large amounts of hazardous or toxic materials. A dry cleaning business had previously operated at the Site, and the Site is part of the State Superfund Program. The NYSDEC has required the preparation of a Site Management Plan (SMP) and the execution of an environmental easement to govern the redevelopment of the Land. Applicant has agreed to implement all requirements of the SMP during redevelopment of the Site. In addition, the Agency has reviewed a letter from the NYSDEC, dated September 18, 2017, indicating that the proposed use of the site (i.e., assisted living) comports with the Restricted Residential use restriction in the environmental easement and SMP. Any solid waste generated at the Project Facility will be properly disposed of pursuant to Federal, State and local laws and regulations. Accordingly, the Project will not create any significant adverse impact to public health.
14. Impact on Growth and Character of the Community and Neighborhood. The Project will not result in significant population growth, and is in character with adjacent commercial development and surrounding uses. Accordingly, the Project will not create any significant adverse impacts to the growth or character of the community.
15. Considering all of the above, the Project will not have a significant adverse impact upon the environment and a negative declaration pursuant to SEQRA is hereby issued.

Section 3. The Chairman, the Vice Chairman, the Executive Director and the Administrative Director of the Agency are hereby further authorized on behalf of the Agency, or acting together or individually, to distribute copies of this Resolution to the Applicant and to do such further things or perform such acts as may be necessary or convenient to implement the provisions of this Resolution.

Section 4. This Resolution shall take effect immediately.

The question of the adoption of the foregoing Resolution was duly put to a vote on roll call, which resulted as follows:

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only (If applicable)

Project:
 Date:

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact.
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

No moderate to large impacts have been identified. Applicant has provided Part I of the Full Environmental Assessment Form ("EAF"), along with supporting documentation which strongly supports issuance of a negative declaration. See attached Resolution/Negative Declaration.

Determination of Significance - Type I and Unlisted Actions

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Nassau County Industrial Development Agency as lead agency that:

☒ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
