Application of Terwilliger & Bartone Properties LLC

**Part II:**

C. The development of this new 72-unit, luxury multifamily apartment development will serve as a great asset to the Village of Westbury. The Village has undergone a multi-year process which culminated with the rezoning of properties around the downtown and train station. State grant funds were secured by the Village for this and other initiatives. One of the primary goals of the Village is to encourage redevelopment in this zoning district with new multifamily projects. This application is for a property 1000’ from the train station and it will replace an old, blighted, underutilized warehouse property with a new vibrant luxury multifamily building. While this project will allow the Terwilliger & Bartone Properties to expand its presence in Nassau County, the County and Village will also benefit from the Applicant’s successful track record of revitalizing downtown communities on Long Island through the development of smart and sustainable amenity-rich rental communities. Without the assistance of the NC IDA, however, the project will not be economically viable, and Terwilliger & Bartone Properties will have no choice but to exercise its contractual option to terminate the project. In the event the applicant exercises its option to terminate the project, the property will remain as a blighted underutilized warehouse.

E. Without assistance from the NC IDA the project will not be economically feasible due to unpredictable real estate taxes and high construction costs. As a result, the property will not be re-developed, the tax base will not increase over time, no new work force housing units will be created, and it will have a negative impact on the Village’s redevelopment goals.

R. Social and economic impacts on the community: The project will create a new, vibrant, well-lit and staffed building in place of a blighted warehouse. Truck and tractor-trailer traffic from the warehouse will be eliminated. It will introduce new residents into the community and provide a much-needed housing option, plus provide for ten (10%) percent of the units constructed as new affordable work force housing units. New discretionary spending being infused by the creation of 72 new housing units is forecasted to be approximately $2.88M which will help bolster the downtown. The project scores a 75 on the Walkscore.com scale being classified as “very walkable” which will encourage mass transit use and downtown foot traffic.

Infrastructure: Availability letters have been provided by PSEG, National Grid, NC Sewer District, and Westbury Water District. Further, the Village underwent a multi-year study to verify the new zoning laws and area re-development would not strain the local infrastructure. The site has private trash removal which creates zero impact on public sanitation.

Transportation: The project is 1000’ from the Westbury train station in addition to numerous bus lines which will encourage residents to use mass transit and as such reduce auto dependency thereby easing traffic concerns.
Fire: The building will be constructed by today’s standards with fire separations and a NFPA type 13 fire sprinkler system all certified by the NC Fire Marshal. The elevator will be a 3500 lb stretcher rated elevator and the building has good fire department access from 2 streets.

Police: The building will be a secure resident access only building with CCTV and onsite staff.
