Nassau County Industrial Development Agency
1 West Street
Fourth Floor
Mineola, New York 11501

Attention: Mr. Sheldon L. Shrenkel,
Chief Executive Officer/ Executive Director

Re: 120 3rd Street, Mineola, New York
125 3rd Street, Mineola, New York
111 2nd Street, Mineola, New York

Dear Mr. Shrenkel:

Please be advised that this firm is representing Lalezarian Properties LLC (“Lalezarian Properties”) in connection with a proposed multi-family transit-oriented development in the Village of Mineola.

As you may know, the Lalezarian family is a well-known Long Island-based developer that focuses on developing smart and sustainable amenity-rich rental communities. Lalezarian Properties has had a successful track record with the Agency with a number of successful projects built in Nassau County with the assistance of the Nassau County Industrial Development Agency (the “Agency”). The One Third Avenue and Morgan Parc projects are great examples of the types of developments that have been built by the Lalezarians with the assistance of the Agency.

The new project consists of the development and construction of three vibrant, first-class multi-family buildings providing a total of five hundred thirty-two (532) new residential units in Mineola located and described as follows:

- 125 Third Street, Mineola, New York (the “125 3rd Street Facility”), which will consist of two hundred forty (240) residential units owned by OCR Court House LLC (“Court House”);

- 120 Third Street, Mineola, New York (the “120 3rd Street Facility”), which will consist of two hundred (200) residential units owned by Third Front LLC (“Third Front”); and
- 111 Second Street, Mineola, New York (the “111 2nd Street Facility”), which will consist of ninety-two (92) residential units owned and to be owned by Willis Rail Yards LLC (“Willis” and Willis, Third Front and Court House each being herein referred to as an “Applicant” and collectively, the “Applicants”).

All three (3) facilities have been approved by the Village of Mineola and the Village is very supportive of the project. The new developments are consistent with and in furtherance of Village of Mineola’s Master Plan enacted to increase the vibrancy and economic stability of the Village’s downtown area. Also, as transit-oriented development (each location is within a short walking distance to the Mineola train station and in close proximity to a number of bus lines), the Village has determined that the projects qualify as smart growth components of the Village’s Downtown Revitalization Program. The proximity to the train station and bus lines will facilitate and encourage residents to use mass transit and ultimately reduce the demand for automobiles.

The 125 3rd Street Facility will involve the demolition of an existing dated office building, in a market where there is a surplus of such office space, and the construction of a two hundred forty (240) unit apartment building. The 120 3rd Street Facility will involve the demolition of an existing parking deck and the construction of a two hundred (200) unit apartment building. The 111 2nd Street Facility will involve the construction of a ninety-two (92) unit apartment building on currently vacant land, a portion of which will be acquired from the Metropolitan Transportation Authority pursuant to a land swap agreement.

The three (3) facilities as a whole will maintain a total of fifty-four (54) affordable/workforce housing units in the aggregate.

Requested Financial Assistance

Given the high financing costs, volatile property taxes, high construction costs and high interest rates in Nassau County and taking into consideration the affordable housing requirement, the projects are not feasible without the Agency’s financial assistance. Without the IDA’s assistance in reducing the development costs and providing stability and predictability with respect to the real estate taxes, the projects would likely be developed with an alternative use not as beneficial to the Village and Nassau County as a transit-oriented multifamily development.

Accordingly, Applicants request the following financial assistance from the Agency:

1. Applicants are requesting a Payment in Lieu of Taxes (“PILOT”) agreement for each project that would consist of a three (3) year construction period followed by an initial twenty (20) year period, at first stabilizing the existing taxes (with a 2% annual escalator) for the first ten (10) years of such twenty (20) year period, and thereafter for the next ten (10) years of such twenty (20) year period phasing-in the new taxes to

March 14, 2024

Page 3

be created by the projects; and, then, after that 20-year period, Applicants are requesting that there be an additional ten (10) year period of PILOT payments, but set at the estimated "full taxes" projected for such (10) year period (with a two (2%) annual escalator), all upon terms to be negotiated with the Agency.

2. Applicants request a sales tax exemption with respect to the costs of constructing and equipping the project.
3. Applicants request a mortgage recording tax exemption with respect to Applicants' financing of the acquisition and construction of the project.

Enclosed please find a draft Applications for Financial Assistance for each proposed project. We have also included checks for each project for the \$1,500.00 Application Fee, the \$3,500.00 Counsel Fee Deposit, the \$4,500.00 Cost/Benefit Deposit and the \$500.00 for the Valuation Deposit for a total payment of \$30,000.00 with respect to all three (3) projects.

After you review the enclosed, please do not hesitate to contact the undersigned

Very truly yours,

FORCHELLI DEEGAN TERRANA LLP

Page 1, Item A. Brief Description of the Proposed Action

The Proposed Action involves an application for special permit approval under the Development Incentive Bonus legislation (§ 550.5[l]) of the Village Code), site plan approval, and relaxation of certain dimensional, use and parking requirements, as well as other approvals to permit the redevelopment of two separate properties comprising 2.4± acres located at 114/110 Old Country Road (1.27 acres) and 109/121 Front Street (1.08 acres), in the Village of Mineola, Nassau County, New York (the “Subject Property”) (see attached Site Location Map). The Proposed Action involves the development of two new buildings: a nine-story (plus mezzanine and penthouse), 352,000-gross-square-foot (gsf) multifamily residential apartment building between Third Street and Old Country Road (the “South Building”) and a nine-story (plus mezzanine and penthouse), 352,000 gsf multifamily residential apartment building between Third Street and Front Street (the “North Building”). In conformance with the Proposed Action’s application of the Development Incentive Bonus Overlay, the Applicant would provide community benefits/amenities in accordance with Village requirements in terms acceptable to both the Applicant and the Village.

The Subject Property is currently developed with a 115,000±-square foot office building at 114 Old Country Road, as well as the two-story commercial building at 110 Old Country Road, where the South Building is proposed, and a two-level parking deck at 109 Front Street and a vacant lot at 121 Front Street (formerly a professional office), where the North Building is proposed. The current condition of the South Parcel includes underutilized office space, with only 52 percent of the building being actively rented, and 20 percent of the building being actively occupied due to employees working remotely. The Proposed Action includes the demolition and removal of all of the structures on the Subject Property and the construction of two multifamily residential buildings and associated parking, as described above.

Both proposed buildings would be developed with three-level subsurface parking garages located below each building. A total of 391 parking spaces would be provided in the South Building and 371 spaces in the North Building. Access to the North Building is proposed via a left-in driveway on Front Street (since Front Street is one-way, westbound) and a left-out driveway on Third Street (since Third Street is one-way, eastbound). Vehicular access for the South Building would be provided via a right-in driveway on the southbound one-way Roslyn Road and a right-out driveway located on Third Street opposite the left-out driveway for the North Building. Landscaped courtyard areas are proposed to be developed at both the South Building and the North Building (facing each other) for residential pick-up and drop-off. No long-term parking will be permitted in the courtyard spaces.

The ground floors of each building would contain lobby space and other residential amenity space, as well as various support spaces. Potential amenities for the buildings include the following: fitness center, roof deck, swimming pool, attended lobby, resident lounge, co-working space/business center, gaming simulator room, bicycle room, electric vehicle charging stations, and package center. The first through penthouse floors would contain 240 units in the South Building and 250 units in the North Building. See the table below for the bedroom mix for each building.

Stormwater generated on-site would be directed to concrete leaching galleys located under the perimeters of both the South Building and the North Building. Drywells are proposed to be installed along

the access driveway that leads to the garage of the South Building from Roslyn Road. The Subject Property's proposed stormwater management system would be designed to contain and recharge stormwater on-site; therefore, there would be virtually no stormwater overflow to adjacent properties or roadways.

Potable water and sewage disposal would be provided/accommodated by the Mineola Water and Sewer Department. Electricity would be provided by PSEG Long Island. Natural gas would be supplied by National Grid. The Proposed Action would also include high efficiency gas boilers for heat and hot water as well as an emergency backup generator.

This Environmental Assessment Form (EAF) presents an analysis of 9,840 sf of commercial space on the ground floor of the South Building with respect to water demand/sanitary sewage generation. However, it is expected that the ground floor would actually house amenity space, open solely to residents. Therefore, the analyses included in this EAF represent a worst-case scenario with respect to potential impacts. It is noted that the remainder of the analyses in this EAF assume only residential and amenity space in both buildings.

Page 5, Item D.2.c. Water Demand

Empirical data (water bills) from Morgan Parc and One Third Avenue, which are similar multifamily residential developments in the Village were used to calculate anticipated water demand resulting from implementation of the Proposed Action. Potable water demand is anticipated to be 49,984± gpd (24,984± gpd at the South Building and 25,000± gpd at the North Building). These figures (which represent actual water usage) are significantly lower than projected water demand that would otherwise occur based on the use of Nassau County Department of Public Works' *Minimum Design Sewage Flow Rates*, and reflect a more accurate representation of what the demand on water infrastructure would be. It is noted that the total water use, including irrigation during the growing season, is expected to be 52,483± gpd. In association with the Proposed Action, a request for water availability for each building will be submitted to the Mineola Water Department prior to construction.

Page 5, Item D.2.e. Liquid Waste Generation

As discussed above, empirical data from similar multifamily residential developments were utilized to calculate anticipated water demand. Based on the results of the water bills, it could be inferred that sewage generation and the demand on sewage infrastructure would also be similarly lower, at approximately 49,984± gpd. However, according to the Nassau County Department of Public Works' *Minimum Design Sewage Flow Rates*, which are based on the infrastructure design for peak effluent flows, the projected sanitary wastewater generation would be approximately 125,484± gpd (60,684± gpd at the South Building and 64,800± gpd at the North Building). Although the demand on sewage infrastructure, based on County rates is expected to be approximately 125,484± gpd, it is anticipated that the actual sewage demand would be lower during project operations (49,984± gpd), as noted above. Prior to implementation of the Proposed Action, a service availability letter will be obtained from the Mineola Water and Sewer Department, as well as the Nassau County Department of Public Works (NCDPW) regarding availability at the sewage treatment plant.
