Incorporated Village of Mineola  
Nassau County, New York**

**Page 1, Item A. Brief Description of the Proposed Action**

The Proposed Action involves an application for special permit approval under the Development Incentive Bonus legislation (§ 550.5[l]) of the Village Code), site plan approval, and relaxation of certain dimensional, use and parking requirements, as well as other approvals to permit the redevelopment of two separate properties comprising 2.51± acres located at 110/114 Old Country Road (1.27± acres) and 105, 109, 121, 125 Front Street and 106 Third Street (1.24± acres), in the Village of Mineola, Nassau County, New York (the "Subject Property") (see attached Site Location Map). The Proposed Action involves the development of two new buildings: a 10-story, 323,805 gross-square-foot (gsf) multifamily residential apartment building between Third Street and Old Country Road (the "South Building") and a 10-story, 338,380-gsf multifamily residential apartment building between Third Street and Front Street (the "North Building"). In conformance with the Proposed Action's application of the Development Incentive Bonus Overlay, the Applicant would provide community benefits/amenities in accordance with Village requirements in terms acceptable to both the Applicant and the Village.

The Subject Property is currently developed as follows:

- 110 Old Country Road – 5,600 SF office (100% vacant for approximately one year)
- 114 Old Country Road – 115,000 SF office building (65% vacant)
- 105/109 Front Street – two level parking deck
- 121 Front Street – vacant (former professional office, demolished)
- 125 Front Street – 1,300 SF office (occupied)
- 106 Third Street – 1,400 SF office (occupied).

In total there are approximately 400 off-street parking spaces provided among the various parcels that make up the Subject Property. The Proposed Action includes the demolition and removal of all the structures on the Subject Property and the construction of two multifamily residential buildings and associated parking, as described above.

Both proposed buildings would be developed with three-level subsurface parking garages located below each building. A total of 372 parking spaces would be provided in the South Building and 386 spaces in the North Building. Access to the North Building is proposed via a left-in driveway on Front Street (since Front Street is one-way, westbound) and a left-out driveway on Third Street (since Third Street is one-way, eastbound). Vehicular access for the South Building would be provided via a right-in driveway on the southbound one-way Roslyn Road and a right-out driveway located on Third Street opposite the left-out driveway for the North Building. Landscaped courtyard areas are proposed to be developed at both the South Building and the North Building (facing each other) for residential pick-up and drop-off. No long-term parking will be permitted in the courtyard spaces.

The first and second floors of each building would contain lobby space and other residential amenity space, as well as various support spaces. Potential amenities for the buildings include the following: fitness center, roof deck, swimming pool, attended lobby, resident lounge, co-working space/business center,

bicycle storage, electric vehicle charging stations, and package center. The South Building and the North Building will each contain 250 units across the 10 floors. See the table below for the bedroom mix for each building.

Stormwater generated on-site would be directed to concrete leaching galleys located under the perimeters of both the South Building and the North Building. Drywells are proposed to be installed along the access driveway that leads to the garage of the South Building from Roslyn Road. The Subject Property's proposed stormwater management system would be designed to contain and recharge stormwater on-site; therefore, there would be virtually no stormwater overflow to adjacent properties or roadways.

Potable water and sewage disposal would be provided/accommodated by the Mineola Water and Sewer Department, discharging to the Bay Park Sewage Treatment Plant administered by the Nassau County Department of Public Works. Electricity would be provided by PSEG Long Island. Natural gas would be supplied by National Grid. The Proposed Action would also include high efficiency gas boilers for heat and hot water as well as an emergency backup generator.

**Page 5, Item D.2.c. Water Demand**

Empirical data (water bills) from Morgan Parc and One Third Avenue, which are similar multifamily residential developments in the Village were used to calculate anticipated water demand resulting from implementation of the Proposed Action. Potable water demand is anticipated to be 50,000± gpd (25,000± gpd at the South Building and 25,000± gpd at the North Building). These figures (which represent actual water usage) are significantly lower than projected water demand that would otherwise occur based on the use of Nassau County Department of Public Works' *Minimum Design Sewage Flow Rates*, and reflect a more accurate representation of what the demand on water infrastructure would be. It is noted that the total water use, including irrigation during the growing season, is expected to be 52,500± gpd. In association with the Proposed Action, a determination of water availability for each building has been requested, and will be obtained from the Mineola Water Department prior to construction.

**Page 5, Item D.2.e. Liquid Waste Generation**

As discussed above, empirical data from similar multifamily residential developments were utilized to calculate anticipated water demand. Based on the results of the water bills, it could be inferred that sewage generation and the demand on sewage infrastructure would also be similarly lower, at approximately 50,000± gpd. However, according to the Nassau County Department of Public Works' *Minimum Design Sewage Flow Rates*, which are based on the infrastructure design for peak effluent flows, the projected sanitary wastewater generation would be approximately 124,000± gpd (59,200± gpd at the South Building and 64,800± gpd at the North Building). Although the demand on sewage infrastructure, based on County rates is expected to be approximately 124,000± gpd, it is anticipated that the actual sewage demand would be lower during project operations, as noted above. Prior to implementation of the Proposed Action, a service availability letter will be obtained from the Mineola Water and Sewer Department. The Nassau County Department of Public Works (NCDPW) has confirmed that the Bay Park Sewage Treatment Plant has adequate capacity to service the proposed development (see enclosed).

Dear Mr. Racz:

We have received your request for sewer availability for the proposed residential apartment building in the Inc. Village of Mineola.

Be advised that the Nassau County sanitary sewer collection system has sufficient capacity for the anticipated daily sanitary discharge of 58,300 gallons per day; and, the Bay Park Sewage Treatment Plant also has sufficient capacity for treatment of the same anticipated flows. However, final approval to connect to the sanitary sewer system will be by permit issued by the Village of Mineola.

Should you have any questions, please contact Mr. Peter Pyne at (516) 571-6843.
