Nassau County Industrial Development Agency  
1 West Street  
Fourth Floor  
Mineola, New York 11501

Attention: Mr. Sheldon L. Shrenkel,  
Chief Executive Officer/ Executive Director

**Re: 120 3rd Street, Mineola, New York**  
**125 3rd Street, Mineola, New York**  
**111 2<sup>nd</sup> Street, Mineola, New York**

Dear Mr. Shrenkel:

Please be advised that this firm is representing Lalezarian Properties LLC (“Lalezarian Properties”) in connection with a proposed multi-family transit-oriented development in the Village of Mineola.

As you may know, the Lalezarian family is a well-known Long Island-based developer that focuses on developing smart and sustainable amenity-rich rental communities. Lalezarian Properties has had a successful track record with the Agency with a number of successful projects built in Nassau County with the assistance of the Nassau County Industrial Development Agency (the “Agency”). The One Third Avenue and Morgan Parc projects are great examples of the types of developments that have been built by the Lalezarians with the assistance of the Agency.

The new project consists of the development and construction of three vibrant, first-class multi-family buildings providing a total of five hundred thirty-two (532) new residential units in Mineola located and described as follows:

- 125 Third Street, Mineola, New York (the “125 3<sup>rd</sup> Street Facility”), which will consist of two hundred forty (240) residential units owned by OCR Court House LLC (“Court House”);

- 120 Third Street, Mineola, New York (the “120 3<sup>rd</sup> Street Facility”), which will consist of two hundred (200) residential units owned by Third Front LLC (“Third Front”); and
- 111 Second Street, Mineola, New York (the “111 2<sup>nd</sup> Street Facility”), which will consist of ninety-two (92) residential units owned and to be owned by Willis Rail Yards LLC (“Willis” and Willis, Third Front and Court House each being herein referred to as an “Applicant” and collectively, the “Applicants”).

All three (3) facilities have been approved by the Village of Mineola and the Village is very supportive of the project. The new developments are consistent with and in furtherance of Village of Mineola’s Master Plan enacted to increase the vibrancy and economic stability of the Village’s downtown area. Also, as transit-oriented development (each location is within a short walking distance to the Mineola train station and in close proximity to a number of bus lines), the Village has determined that the projects qualify as smart growth components of the Village’s Downtown Revitalization Program. The proximity to the train station and bus lines will facilitate and encourage residents to use mass transit and ultimately reduce the demand for automobiles.

The 125 3rd Street Facility will involve the demolition of an existing dated office building, in a market where there is a surplus of such office space, and the construction of a two hundred forty (240) unit apartment building. The 120 3rd Street Facility will involve the demolition of an existing parking deck and the construction of a two hundred (200) unit apartment building. The 111 2<sup>nd</sup> Street Facility will involve the construction of a ninety-two (92) unit apartment building on currently vacant land, a portion of which will be acquired from the Metropolitan Transportation Authority pursuant to a land swap agreement.

The three (3) facilities as a whole will maintain a total of fifty-four (54) affordable/workforce housing units in the aggregate.

### **Requested Financial Assistance**

Given the high financing costs, volatile property taxes, high construction costs and high interest rates in Nassau County and taking into consideration the affordable housing requirement, the projects are not feasible without the Agency’s financial assistance. Without the IDA’s assistance in reducing the development costs and providing stability and predictability with respect to the real estate taxes, the projects would likely be developed with an alternative use not as beneficial to the Village and Nassau County as a transit-oriented multifamily development.

Accordingly, Applicants request the following financial assistance from the Agency:

1. Applicants are requesting a Payment in Lieu of Taxes (“PILOT”) agreement for each project that would consist of a three (3) year construction period followed by an initial twenty (20) year period, at first stabilizing the existing taxes (with a 2% annual escalator) for the first ten (10) years of such twenty (20) year period, and thereafter for the next ten (10) years of such twenty (20) year period phasing-in the new taxes to

March 14, 2024

Page 3

be created by the projects; and, then, after that 20-year period, Applicants are requesting that there be an additional ten (10) year period of PILOT payments, but set at the estimated "full taxes" projected for such (10) year period (with a two (2%) annual escalator), all upon terms to be negotiated with the Agency.

2. Applicants request a sales tax exemption with respect to the costs of constructing and equipping the project.
3. Applicants request a mortgage recording tax exemption with respect to Applicants' financing of the acquisition and construction of the project.

Enclosed please find a draft Applications for Financial Assistance for each proposed project. We have also included checks for each project for the \$1,500.00 Application Fee, the \$3,500.00 Counsel Fee Deposit, the \$4,500.00 Cost/Benefit Deposit and the \$500.00 for the Valuation Deposit for a total payment of \$30,000.00 with respect to all three (3) projects.

After you review the enclosed, please do not hesitate to contact the undersigned

Very truly yours,

FORCHELLI DEEGAN TERRANA LLP

## 111 Second Street Development Project 92 Multifamily Units

### ADENDUM TO EXPAND UPON INFORMATION IN THE ENVIRONMENTAL ASSESSMENT FORM

#### D.2.c. Water Supply and Demand

According to the Village of Mineola website, the Water Department is responsible for the production, treatment, and distribution of potable drinking water to its residents. The Water Department also conducts lead and copper testing, meter testing, annual hydrant flushing and repair and maintenance program, and leak detection services for the approximately 52 miles of water mains within the Village.

The Subject Property is located within the service area of the Mineola Water Department. The site was previously developed with a commercial property that generated water demand, which is supplied to the Subject Property via Water Department infrastructure. As such, existing Water Department infrastructure is found within Second Street and Willis Avenue.

Potable drinking water would be conveyed via the Water Department's existing infrastructure to the Subject Property. As the Proposed Action would contain 92 total units, including 85 one-bedroom units, 7 two-bedroom units, and approximately 5,200 square feet of amenity space, the Proposed Action would generate approximately 19,100 gpd of potable water demand, based on the Nassau County Minimum Design Sewage Flow Rates for sewered areas, plus irrigation. See Table 1 below.

However, to further review projected water demand for the Proposed Project, as requested by the Village, empirical data (water bills) from Morgan Parc and One Third Avenue, which are similar multifamily residential TODs in the Village, were used. In reviewing the data, these two buildings yielded an average water use of approximately 100 gpd (Appendix A). It is noted that both buildings from which the empirical data is derived contain non-residential uses. Using the factor of 100 gpd per residential unit, with 0.1 gpd per square foot of commercial space, the Proposed Action is expected to generate 9,200± gpd of potable water demand. These figures (which represent actual water usage at two other similar buildings in the Village) are significantly lower than projected water demand than would otherwise be expected based on County factors and reflect a more accurate representation of what the demand on water infrastructure would be. In association with the Proposed Action, a request for water availability for each building will be submitted to the Mineola Water Department prior to construction. Given the anticipated 9,200± gpd of water demand that will be generated, water demand would be increased from existing conditions. No significant adverse impacts associated with water consumption are expected to result from implementation of the Proposed Action.

#### D.2.d. Liquid Waste Disposal

The Subject Property is located within the service area of the Mineola Sewer Department. A portion of the Subject Property was previously developed and generated sanitary waste that was disposed of through the Mineola sewer infrastructure. As such, existing Mineola sewer infrastructure is found within the Subject Property.

According to the Village website, the Sewer Department is responsible for the maintenance and repair of the Village's 70 miles of sanitary sewer mains and lines. The Village sewerage infrastructure discharges sanitary wastewater at Nassau County's Bay Park Sewage Treatment Plant (STP). The Bay Park STP has permitted capacity to treat 70 million gpd of sanitary wastewater but treats approximately 50 million gpd.

Sewage generated by the Proposed Action would be conveyed to the Bay Park STP via the Village sewage infrastructure. As the proposed buildings would contain 92 total units, including 85 one-bedroom units and 7 two-bedroom units, and approximately 5,200 square feet of amenity space, based on the Nassau County Minimum Design Sewage Flow Rates for sewered areas, the Proposed Action would generate approximately 19,100 gpd, a very conservative estimate, as detailed in Table 1 below.

Table 1 Projected Sanitary Waste Generation			
Use	Factor (gallons per day [gpd])	Unit Count / Square Footage	Sanitary Waste Generation
Total Subject Property	Sanitary Waste Generation		
One-Bedroom Unit	200	85	17,000 ± gpd
Two-Bedroom Unit	300	7	2,100 ± gpd
		Total GPD	19,100 ± gpd

Although the demand on sewage infrastructure is anticipated to be approximately 19,100 ± gpd based upon Nassau County Department of Public Works' Minimum Design Sewage Flow Rates, it is anticipated that the actual sewage demand would be lower during project operations. As discussed below empirical data from similar TOD mixed use commercial and multifamily residential developments were utilized to calculate anticipated water demand. Based on the results of the water bills, it could be inferred that the actual sewage generation and the demand on sewage infrastructure would also be lower than the projected sanitary waste generation shown in the table above.

In association with the Proposed Action, sewer availability requests will be submitted to the Mineola Sewer Department and NCDPW prior to construction. Given the anticipated generation of 9,200± gpd of sanitary waste that will be generated, sanitary waste would be increased from existing conditions. However, no significant adverse impacts associated with sanitary waste disposal are expected to result from implementation of the Proposed Action.
